Chanson PJ-6000

Chanson PJ-6000 high efficiency unwoven fiber activated carbon nano filter ---(made in Japan)

What are Chanson insist?

Chanson is the only one company use the pure unwoven fiber activated carbon to purify the water, we insist on chemicals free material in the PJ-6000.

Choose high quality and advanced technology fiber carbon.

Advantages:

- 20 times absorption volume ability more than normal activate carbon.
- 150 times surface area adsorption ability more than normal activated carbon.
- 10 times speed absorption more than normal activated carbon.

Antibacterial components

Reduce lead, heavy metals, bacterial.

High efficiency activated carbon

High density surface area activated carbon reduces odor , Chlorine ,THMs, moulds , bleach,organic,parasite,color,VOCs,Benzene.

Food grade unwoven fiber

Removes tiny molecules, sand, silt, fungi and bacterial
