

**Filter Klear® MarKey™
Stainless Steel Housings**

Filter Klear® MarKey™ Stainless Steel Housings provide versatile and rugged construction

Keystone Filter Klear® MarKey™ Stainless Steel Housings provide an ideal solution for high temperature, high pressure, or demanding filtration applications where stainless steel construction is desired.

Features and Benefits

- **Rugged 304 SS construction** allows for use in applications where stainless steel is preferred, including food and beverage
- **High maximum temperature operation** make these housings the perfect choice for high temperature applications, including hot water and hot process liquids
- **Top quality and economical construction** insures low total cost of ownership with years of trouble free service

Specifications

MATERIALS OF CONSTRUCTION:

Body and Head: AISI 304 Stainless Steel
O-rings: Silica Gel, EPDM

OPERATING PARAMETERS:

Maximum Pressure: 300 psi @ 200 °F
Maximum Temperature 200°F (93°C)
Cartridge Capacity: Holds single filter cartridge

REGULATORY COMPLIANCE

Certain housings conform to material and structural integrity requirements of NSF/ANSI Standard 42 for Drinking Water Treatment Units – Aesthetic Effects.

Applications

- Process Water, Including High Temperature Applications
- RO Prefiltration
- Potable Water
- Heating Systems
- Beverage Processing
- Any Application Where the Use of Stainless for Filtration is Indicated
